S E S
SPOT EXTRACTOR SYSTEM

The Company

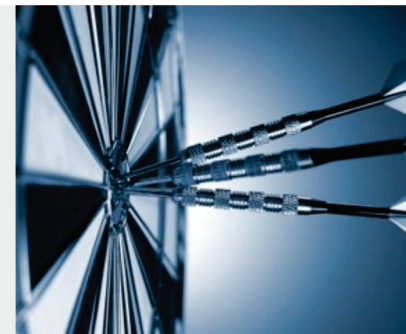

Spot Extractor System is established in the year of 2007 is now a big name in Manufacturing & Exports of Mobile Extractor with filter unit and Local Exhaust System in Laboratories, where great flexibility is required. It can be ventilated contaminated air so it protects both user and workplace safely from harmful fumes.

We are working with many states with our excellence spotext team, Last couple of years at Spotext , we improve our business operations continue always striving for innovation and Evolution

We believe that the success of our business is sustained by individual efforts, good teamwork and sincere communication with our clients & their complete satisfaction.

Our Vision & Mission is to offer our many years of experience in Local Extractor System & Mobile Extractor with Filter Unit. Spotext is Working with Many States with our Excellence spotext team.

Our Vision & Mission

Premium Products

- ✔ Laboratory Fume Extractor
- ✔ Air Burns Extraction System
- ✔ Mobile Fume Extractor
- ✔ Multi Arm Fume Extractor
- ✔ Fume Filter
- ✔ Ceiling Mounted Extractor
- ✔ Bench Mounted Fume Extractor
- ✔ Wall Mounted Extractor

Spot Extractor System provides a wide range of Air Purification Systems in the market. Manufactured, Supplied and Exported by the company, the range includes Fume Extractor and Industrial Fume Filter. We offer various standard models and can also undertake customization of the system on the basis of specific drawings and details given by clients. All the Air Purification Systems offered by us are majorly used across Pharmaceutical units, Chemical industry, Food Processing plants, Research laboratories and other establishments around the world.

Resources

We have high-end facilities for manufacturing, which enables us to meet bulk and specific orders on time. The advanced machines and equipment is properly maintained and upgraded for better production while warehousing is properly maintained. Manned by experienced engineers and technicians, the unit is also supported by expert quality controllers and research professionals who work towards attaining the company's goals.

Assured Quality

We have a complete management system for controlling quality. Design and manufacturing process is strictly monitored along with all other departments. The activities mainly include:

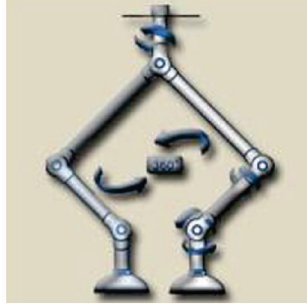

- Ensuring the use of best materials in production
- We also organize regular workshops to keep the professionals aware of the latest technological developments in the sector
- Strict testing is done on each system using latest instrumentation before delivery

Fume Extractor

Laboratory Fume Extractor

Due to our rich industry experience and industrious knowledge, we have been able to render our clients with a wide assortment of Laboratory Fume Extractor. It is manufactured using high-grade raw material, which is sourced from certified vendors based across the market. Our range of Laboratory Fume Extractor is highly demanded by the clients owing to its excellent performance, rugged construction & long working life. Due to our rich industry experience and industrious knowledge, we have been able to render our clients with a wide assortment of Laboratory Fume Extractor. It is manufactured using high-grade raw material, which is sourced from certified vendors based across the market. Our range of Laboratory Fume Extractor is highly demanded by the clients owing to its excellent performance, rugged construction & long working life. We are one of the renowned names engaged in offering a vast range of Laboratory Fume Extractor Dome. It works as a local exhaust system and finds application in laboratories , pharmaceutical unit & production environments. Our range of Laboratory Fume Extractor Dome holds the capability to ventilate contaminated air in order to protect both user and workplace safely from harmful fumes. This product range is provided with an anodized aluminum & PP pipe arm along with PP & ABS joints that are available in 72mm size.

Air burns Extraction System

With the help of our distinguished professionals, we are able to serve our clients with a quality range of Air Burns Extraction System. It is compact in design and used for collecting smoke that is released during all welding and other processes. Our range of Air Burns Extraction System is in conformation with industrial guidelines and extensively used for laboratories, chemical industry, pharmaceutical unit & production environments.

Fume Extractor

Mobile Fume Extractor

We are engaged in manufacturing, supplying and exporting a variety of Multi Arm Fume Extractor. It is available in diverse specifications and appropriate for removing airborne contaminants. Offered at competitive prices, our range of Multi Arm Fume Extractor is best suited to be used in various laboratories, pharmaceutical unit soldering & light duty industries.

Industrial Fume Filter

Laboratory Fume Extractor

We hold expertise in providing Fume Filter, which is offered in varied sizes & specifications. It is highly durable and caters to the needs of ventilation & conditioning in various establishments based in national as well as international markets. Keeping in mind the budgetary constraints of the clients, we offer our range of Fume Filter at industry leading prices. It is highly durable and caters to the needs of ventilation & conditioning in various establishments based in national as well as international markets. Keeping in mind the budgetary constraints of the clients, we offer our range of Fume Filter at industry leading prices.

Mounted Extractor

Ceiling Mounted Extractor

We specialize in offering a broad range of Ceiling Mounted Extractor, which is manufactured using superior quality material sourced from authenticated vendors. It is suitable for removing airborne contaminants and offered in a variety of suction capacities. Our range of Ceiling Mounted Extractor is appreciated for its excellent performance & long working life and offered to the clients at most competitive prices.

Bench Mounted Fume Extractor

Capitalizing on our sound infrastructure and efficient workforce, we have been able to serve our with a quality range of Bench Mounted Fume Extractor. It acts as a local exhaust system and useful in extracting contaminated air and protects user & workplace from dangerous gases and fumes. Our range of Bench Mounted Fume Extractor is highly durable and meets the application requirements of production units, laboratories, pharmaceutical unit and so on.

Wall Mounted Extractor

We bring forth for our clients an array of Wall Mounted Extractor, which is used to ventilate the contaminated air. This helps in keeping the workplace and user safely from harmful fumes. Our range of Wall Mounted Extractor is appreciated for its high performance, durability & perfect finish and finds usage in laboratories, pharmaceutical unit and production environments.
